## Annex 2 - Security Measures

This Annex forms part of the DPA.

Acalvio currently observes the Security Measures described in this Annex 2. All capitalized terms not otherwise defined herein shall have the meanings as set forth in the Agreement.

### a) Access Control

#### i) Preventing Unauthorized Product Access

**Outsourced processing:** Acalvio hosts Acalvio's Service with outsourced cloud infrastructure providers. Additionally, Acalvio maintains contractual relationships with vendors in order to provide the Service in accordance with Acalvio's DPA. Acalvio relies on contractual agreements, privacy policies, and vendor compliance programs in order to protect data processed or stored by these vendors.

**Physical and environmental security:** Acalvio hosts Acalvio's product infrastructure with multi-tenant or single-tenant, outsourced infrastructure providers. The physical and environmental security controls are audited for SOC 2 Type II and ISO 27001 compliance, among other certifications.

**Authentication:** Acalvio implements a uniform password policy for Acalvio's ShadowPlex deployment. Customers who interact with ShadowPlex via the user interface must authenticate before accessing non-public customer data.

**Authorization:** Customer Data is stored in single-tenant or multi-tenant storage systems accessible to Customers via only application user interfaces and application programming interfaces. Customers are not allowed direct access to the underlying application infrastructure. The authorization model in the ShadowPlex deployment is designed to ensure that only the appropriately assigned individuals can access relevant features, views, and customization options. Authorization to data sets is performed through validating the user's permissions against the attributes associated with each data set.

**Application Programming Interface (API) access:** Public product APIs may be accessed using an API key or through Oauth authorization.

#### ii) Preventing Unauthorized Product Use

Acalvio implements industry-standard access controls and detection capabilities for the internal networks that support its products.

**Access controls:** Network access control mechanisms are designed to prevent network traffic using unauthorized protocols from reaching the product infrastructure. The technical measures implemented differ between infrastructure providers and include Virtual Private Cloud (VPC) implementations, security group assignment, and traditional firewall rules.

**Static code analysis:** Security reviews of code stored in Acalvio's source code repositories is performed, checking for coding best practices and identifiable software flaws.

**Penetration testing:** Acalvio maintains relationships with industry recognized penetration testing service providers for Acalvio's annual penetration tests. The intent of the penetration tests is to identify and resolve foreseeable attack vectors and potential abuse scenarios.

### iii) Limitations of Privilege & Authorization Requirements

**Product access:** A subset of Acalvio's employees have access to the products and to customer data via controlled interfaces. The intent of providing access to a subset of employees is to provide effective customer support, to troubleshoot potential problems, to detect and respond to security incidents and implement data security. Access is enabled through "just in time" requests for access; all such requests are logged. Employees are granted access by role, and reviews of high risk privilege grants are initiated daily. Employee roles are reviewed at least once every six months.

**Background checks:** All Acalvio employees undergo a third-party background check prior to being extended an employment offer, in accordance with and as permitted by the applicable laws. All Acalvio employees are required to conduct themselves in a manner consistent with company guidelines, non-disclosure requirements, and ethical standards.

#### b) Transmission Control

**In-transit:** Acalvio make HTTPS encryption (also referred to as SSL or TLS) available on every one of its login interfaces. Acalvio's HTTPS implementation uses industry standard algorithms and certificates.

**At-rest:** Acalvio stores user passwords following policies that follow industry standard practices for security. Acalvio has implemented technologies to ensure that stored data is encrypted at rest.

#### c) Input Control

**Detection:** Acalvio designed Acalvio's infrastructure to log extensive information about the system behavior, traffic received, system authentication, and other application requests. Internal systems aggregated log data and alert appropriate employees of malicious, unintended, or anomalous activities. Acalvio's personnel, including security, operations, and support personnel, are responsive to known incidents.

**Response and tracking:** Acalvio maintains a record of known security incidents that includes description, dates and times of relevant activities, and incident disposition. Suspected and confirmed security incidents are investigated by security, operations, or support personnel; and appropriate resolution steps are identified and documented. For any confirmed incidents, Acalvio will take appropriate steps to minimize product and Customer damage or unauthorized disclosure. Notification to Customer will be in accordance with the terms of the Agreement.

#### d) Availability Control

**Infrastructure availability:** The infrastructure providers use commercially reasonable efforts to ensure a minimum of 99.9% uptime. The providers maintain a minimum of N+1 redundancy to power, network, and HVAC services.

**Fault tolerance:** Backup and replication strategies are designed to ensure redundancy and fail-over protections during a significant processing failure. Customer data is backed up to multiple durable data stores and replicated across multiple availability zones.

**Online replicas and backups:** Where feasible, production databases are designed to replicate data between no less than 1 primary and 1 secondary database. All databases are backed up and maintained using at least industry standard methods.

Acalvio's products are designed to ensure redundancy and seamless failover. The server instances that support the products are also architected with a goal to prevent single points of failure. This design assists Acalvio's operations in maintaining and updating the product applications and backend while limiting downtime.

- (b) that it has instructed and throughout the duration of the personal data-processing services will instruct the data importer to process the personal data transferred only on the data exporter's behalf and in accordance with the applicable data protection law and the Clauses;
- (c) that the data importer will provide sufficient guarantees in respect of the technical and organisational security measures specified in Appendix 2 to this contract;
- (d) that after assessment of the requirements of the applicable data protection law, the security measures are appropriate to protect personal data against accidental or unlawful destruction or accidental loss, alteration, unauthorised disclosure or access, in particular where the processing involves the transmission of data over a network, and against all other unlawful forms of processing, and that these measures ensure a level of security appropriate to the risks presented by the processing and the nature of the data to be protected having regard to the state of the art and the cost of their implementation;
- (e) that it will ensure compliance with the security measures;

(f) that, if the transfer involves special categories of data, the data subject has been informed or will be informed before, or as soon as possible after, the transfer that its data could be transmitted to a third country not providing adequate protection within the meaning of Directive 95/46/EC;

(g) to forward any notification received from the data importer or any subprocessor pursuant to Clause 5(b) and Clause 8(3) to the data protection supervisory authority if the data exporter decides to continue the transfer or to lift the suspension;

(h) to make available to the data subjects upon request a copy of the Clauses, with the exception of Appendix 2, and a summary description of the security measures, as well as a copy of any contract for subprocessing services which has to be made in accordance with the Clauses, unless the Clauses or the contract contain commercial information, in which case it may remove such commercial information;

(i) that, in the event of subprocessing, the processing activity is carried out in accordance with Clause 11 by a subprocessor providing at least the same level of protection for the personal data and the rights of data subject as the data importer under the Clauses; and

(j) that it will ensure compliance with Clause 4(a) to (i).

#### Clause 5

##### Obligations of the data importer

The data importer agrees and warrants:

(a) to process the personal data only on behalf of the data exporter and in compliance with its instructions and the Clauses; if it cannot provide such compliance for whatever reasons, it agrees to inform promptly the data exporter of its inability to comply, in which case the data exporter is entitled to suspend the transfer of data and/or terminate the contract;

(b) that it has no reason to believe that the legislation applicable to it prevents it from fulfilling the instructions received from the data exporter and its obligations under the contract and that in the event of a change in this legislation which is likely to have a substantial adverse effect on the warranties and obligations provided by the Clauses, it will promptly notify the change to the data exporter as soon as it is aware, in which case the data exporter is entitled to suspend the transfer of data and/or terminate the contract;

(c) that it has implemented the technical and organisational security measures specified in Appendix 2 before processing the personal data transferred;

(d) that it will promptly notify the data exporter about:

(i) any legally binding request for disclosure of the personal data by a law enforcement authority unless otherwise prohibited, such as a prohibition under criminal law to preserve the confidentiality of a law enforcement investigation;

(ii) any accidental or unauthorised access; and

(iii) any request received directly from the data subjects without responding to that request, unless it has been otherwise authorised to do so;

(e) to deal promptly and properly with all inquiries from the data exporter relating to its processing of the personal data subject to the transfer and to abide by the advice of the supervisory authority with regard to the processing of the data transferred;

(f) at the request of the data exporter to submit its data-processing facilities for audit of the processing activities covered by the Clauses which shall be carried out by the data exporter or

an inspection body composed of independent members and in possession of the required professional qualifications bound by a duty of confidentiality, selected by the data exporter, where applicable, in agreement with the supervisory authority;

(g) to make available to the data subject upon request a copy of the Clauses, or any existing contract for subprocessing, unless the Clauses or contract contain commercial information, in which case it may remove such commercial information, with the exception of Appendix 2 which shall be replaced by a summary description of the security measures in those cases where the data subject is unable to obtain a copy from the data exporter;

(h) that, in the event of subprocessing, it has previously informed the data exporter and obtained its prior written consent;

(i) that the processing services by the subprocessor will be carried out in accordance with Clause 11;

(j) to send promptly a copy of any subprocessor agreement it concludes under the Clauses to the data exporter.

## Clause 6

### Liability

1. The parties agree that any data subject, who has suffered damage as a result of any breach of the obligations referred to in Clause 3 or in Clause 11 by any party or subprocessor is entitled to receive compensation from the data exporter for the damage suffered.

2. If a data subject is not able to bring a claim for compensation in accordance with paragraph 1 against the data exporter, arising out of a breach by the data importer or his subprocessor of any of their obligations referred to in Clause 3 or in Clause 11, because the data exporter has factually disappeared or ceased to exist in law or has become insolvent, the data importer agrees that the data subject may issue a claim against the data importer as if it were the data exporter, unless any successor entity has assumed the entire legal obligations of the data exporter by contract or by operation of law, in which case the data subject can enforce its rights against such entity. The data importer may not rely on a breach by a subprocessor of its obligations in order to avoid its own liabilities.

3. If a data subject is not able to bring a claim against the data exporter or the data importer referred to in paragraphs 1 and 2, arising out of a breach by the subprocessor of any of their obligations referred to in Clause 3 or in Clause 11 because both the data exporter and the data importer have factually disappeared or ceased to exist in law or have become insolvent, the subprocessor agrees that the data subject may issue a claim against the data subprocessor with regard to its own processing operations under the Clauses as if it were the data exporter or the data importer, unless any successor entity has assumed the entire legal obligations of the data exporter or data importer by contract or by operation of law, in which case the data subject can enforce its rights against such entity. The liability of the subprocessor shall be limited to its own processing operations under the Clauses.

## Clause 7

### Mediation and jurisdiction

1. The data importer agrees that if the data subject invokes against it third-party beneficiary rights and/or claims compensation for damages under the Clauses, the data importer will accept the decision of the data subject:

(a) to refer the dispute to mediation, by an independent person or, where applicable, by the supervisory authority; (b) to refer the dispute to the courts in the Member State in which the data exporter is established.

2. The parties agree that the choice made by the data subject will not prejudice its substantive or procedural rights to seek remedies in accordance with other provisions of national or international law.

#### Clause 8

##### Cooperation with supervisory authorities

1. The data exporter agrees to deposit a copy of this contract with the supervisory authority if it so requests or if such deposit is required under the applicable data protection law.

2. The parties agree that the supervisory authority has the right to conduct an audit of the data importer, and of any subprocessor, which has the same scope and is subject to the same conditions as would apply to an audit of the data exporter under the applicable data protection law.

3. The data importer shall promptly inform the data exporter about the existence of legislation applicable to it or any subprocessor preventing the conduct of an audit of the data importer, or any subprocessor, pursuant to paragraph 2. In such a case the data exporter shall be entitled to take the measures foreseen in Clause 5(b).

#### Clause 9

##### Governing law

The Clauses shall be governed by the law of the Member State in which the data exporter is established.

#### Clause 10

##### Variation of the contract

The parties undertake not to vary or modify the Clauses. This does not preclude the parties from adding clauses on business related issues where required as long as they do not contradict the Clause.

#### Clause 11

##### Subprocessing

1. The data importer shall not subcontract any of its processing operations performed on behalf of the data exporter under the Clauses without the prior written consent of the data exporter. Where the data importer subcontracts its obligations under the Clauses, with the consent of the data exporter, it shall do so only by way of a written agreement with the subprocessor which imposes the same obligations on the subprocessor as are imposed on the data importer under the Clauses. Where the subprocessor fails to fulfil its data protection obligations under such written agreement the data importer shall remain fully liable to the data exporter for the performance of the subprocessor's obligations under such agreement.

2. The prior written contract between the data importer and the subprocessor shall also provide for a third-party beneficiary clause as laid down in Clause 3 for cases where the data subject is not able to bring the claim for compensation referred to in paragraph 1 of Clause 6 against the data exporter or the data importer because they have factually disappeared or have ceased to exist in law or have become insolvent and no successor entity has assumed the entire legal obligations of the data exporter or data importer by contract or by operation of law. Such third-

party liability of the subprocessor shall be limited to its own processing operations under the Clauses.

3. The provisions relating to data protection aspects for subprocessing of the contract referred to in paragraph 1 shall be governed by the law of the Member State in which the data exporter is established.

4. The data exporter shall keep a list of subprocessing agreements concluded under the Clauses and notified by the data importer pursuant to Clause 5(j), which shall be updated at least once a year. The list shall be available to the data exporter's data protection supervisory authority.

## Clause 12

### Obligation after the termination of personal data-processing services

1. The parties agree that on the termination of the provision of data-processing services, the data importer and the subprocessor shall, at the choice of the data exporter, return all the personal data transferred and the copies thereof to the data exporter or shall destroy all the personal data and certify to the data exporter that it has done so, unless legislation imposed upon the data importer prevents it from returning or destroying all or part of the personal data transferred. In that case, the data importer warrants that it will guarantee the confidentiality of the personal data transferred and will not actively process the personal data transferred anymore.

2. The data importer and the subprocessor warrant that upon request of the data exporter and/or of the supervisory authority, it will submit its data-processing facilities for an audit of the measures referred to in paragraph 1.

## Appendix 3 to the Standard Contractual Clauses

This Appendix forms part of the Standard Contractual Clauses (the 'Clauses').

For the purposes of this Appendix, "DPA" means the Data Processing Agreement in place between Customer and Acalvio and to which these Clauses are incorporated and "Agreement" shall have the meaning given to it in the DPA.

### Clause 4(h) and 8: Disclosure of these Clauses

a. Data exporter agrees that these Clauses constitute data importer's Confidential Information as that term is defined in the Agreement and may not be disclosed by data exporter to any third party without data importer's prior written consent unless permitted pursuant to Agreement. This shall not prevent disclosure of these Clauses to a data subject pursuant to Clause 4(h) or a supervisory authority pursuant to Clause 8.

### Clauses 5(a) and 5(b): Suspension of data transfers and termination

a. The parties acknowledge that data importer may process the personal data only on behalf of the data exporter and in compliance with its instructions as provided by the data exporter and the Clauses.

b. The parties acknowledge that if data importer cannot provide such compliance in accordance with Clause 5(a) and Clause 5(b) for whatever reason, the data importer agrees to inform promptly the data exporter of its inability to comply, in which case the data exporter is entitled to suspend the transfer of data and/or terminate the contract the affected parts of the Services in accordance with the terms of the Agreement.

c. If the data exporter intends to suspend the transfer of personal data and/or terminate the affected parts of the Services, it shall endeavor to provide notice to the data importer and provide data importer with a reasonable period of time to cure the non-compliance ("Cure Period").

d. If required, the parties shall reasonably cooperate with each other during the Cure Period to agree what additional safeguards or other measures, if any, may be reasonably required to ensure the data importer's compliance with the Clauses and applicable data protection law.

e. If after the Cure Period the data importer has not or cannot cure the non-compliance then the data exporter may suspend and/or terminate the affected part of the Services in accordance with the provisions of the Agreement without liability to either party (but without prejudice to any fees incurred by the data exporter prior to suspension or termination). The data exporter shall not be required to provide such notice in instance where it considers there is a material risk of harm to data subjects or their personal data.

#### Clause 5(f): Audit

a. Data exporter acknowledges and agrees that it exercises its audit right under Clause 5(f) by instructing data importer to comply with the audit measures described in the 'Demonstration of Compliance' section of the DPA.

#### Clause 5(j): Disclosure of subprocessor agreements

a. The parties acknowledge the obligation of the data importer to send promptly a copy of any onward subprocessor agreement it concludes under the Clauses to the data exporter.

b. The parties further acknowledge that, pursuant to subprocessor confidentiality restrictions, data importer may be restricted from disclosing onward subprocessor agreements to data exporter. Notwithstanding this, data importer shall use reasonable efforts to require any subprocessor it appoints to permit it to disclose the subprocessor agreement to data exporter.

c. Even where data importer cannot disclose a subprocessor agreement to data exporter, the parties agree that, upon the request of data exporter, data importer shall (on a confidential basis) provide all information it reasonably requires in connection with such subprocessing agreement to data exporter.

#### Clause 6: Liability

a. Any claims brought under the Clauses shall be subject to the terms and conditions, including but not limited to, the exclusions and limitations set forth in the Agreement. In no event shall any party limit its liability with respect to any data subject rights under these Clauses.

The parties acknowledge that, pursuant to FAQ II.1 in Article 29 Working Party Paper WP 176 entitled "FAQs in order to address some issues raised by the entry into force of the EU Commission Decision 2010/87/EU of 5 February 2010 on standard contractual clauses for the transfer of personal data to processors established in third countries under Directive 95/46/EC" the data exporter may provide a general consent to onward subprocessing by the data importer.

b. Accordingly, data exporter provides a general consent to data importer, pursuant to Clause 11 of these Clauses, to engage onward subprocessors. Such consent is conditional on data importer's compliance with the requirements set out in the 'Notification and Objection to New Sub-Processors' section of the DPA.

#### Clause 12: Obligation after the termination of personal data-processing services

a. Data importer agrees that the data exporter will fulfil its obligation to return or destroy all the personal data on the termination of the provision of data-processing services by complying with the 'Deletion or Return of Personal Data' section of the DPA.
